

Join in the third Webinar run by CELA in partnership with APPI:

"Assessing reading comprehension: what every teacher should know"

We will start this webinar by exploring what reading comprehension consists of and what we do in real life when we read. This will be the basis for addressing key questions such as: Which aspects of reading comprehension should we test? What kind of texts and tasks should be used? How should responses be scored? We will also consider the role that language proficiency of the intended test takers plays in answering these questions.
